.

OPC UA

cost-reducing

future-proof

Open Platform Communication network – automate – decide with confidence

Up to **60% Reduction of manual** operations

24/7 **Real-time monitoring**

100% Traceability

A KOMAX COMPANY

OPC UA AT A GLANCE

Seamless integration and compatibility

Easy integration into the existing system infrastructure

- less effort
- smooth processes
- faster productive work

66

Central monitoring and scalability

Get a quick overview of all available data, whether at your site or worldwide. Use this during the entire test process.

Cost reduction through automation

Reduction of manual processing steps thanks to intelligent automation. Existing personnel can be deployed in a more focused manner.

Investment into the future

OPC UA is the standard in automation and is considered future-proof. Invest today - benefit for many years

Security integrated in the protocol

OPC UA itself provides security protocols for implementing security mechanisms. You can flexibly select the level of security you require.

Traceability and well-founded decisions

Complete traceability of every UUT down to the individual test step. Use real-time data to optimize your processes continuously and make wellfounded decisions

Networking of the entire production

Network your entire production and make it possible to use information across the entire production cycle.

A KOMAX COMPANY

OPC UA HOW IT WORKS

The key facts

- Supports data access & methods, events
- No protocol definition necessary
- Flexible selection of security level up to AES256 encryption
- Flexible selection of client
- Platform-indepedent user
- Optional integration of Komax Connect for visualization

Setup steps

- Optional setup of clients
- Establishing the client-server connection

01

02

Example from the field

Visualization example with Komax Connect

- Integration into existing system environment
- Profit from the results in everyday life
